

STAIN-FREE!

Minimal lubrication system

EXM Series / EXTM Series

Dramatically reduces the amount of lubrication while keeping the conventional maximum machine speed!

These minimal lubrication system sewing machines solve the problem of oil splashing and eliminate oil stain removal operations.

Features

- Thanks to the specially-coated needle bar and upper looper shaft, the maximum machine speed can be maintained successfully as in previous models.
- The amount of lubrication required at the right looper holder is reduced by 90%, compared to that of the conventional company products.
- The oil draining effectiveness is increased on the needle bar mechanism. In addition, a forced oil-drain pump removes excessive oil from the area around the needle bar.
- The enhanced oil blocking effectiveness of the feed mechanism prevents oil splashing from the feed mechanism.

Applicable models : EX3200M series/EX5200M series EXT3200M series/EXT5200M series
